

Reinventing the Wheel

The humble trolley is the “working buddy” of many waste pickers in Hong Kong, many of whom are older adults, working to earn a meagre income.

To improve conventional trolleys which are cumbersome and difficult to manoeuvre, JCDISI formed a co-creation team consisting of designers, local advocates and wastepickers to collaboratively design an improved trolley. After an 8-month process of field observations, discussions with wastepickers and product development, the team decided on a number of enhancements, indicated in the diagram.

Activity: Test drive the trolley

Test out the features of our trolley around the test track!

新車駕到

香港許多拾荒者以簡陋的手推車為伴，其中很多都是長者，胼手胝足賺取微薄的收入糊口。

傳統手推車非常笨重，難以操作，有見及此，JCDISI召集一支由設計師、關心社區的人士及拾荒者組成的共創團隊，合力改良手推車的設計。團隊花了八個月時間作實地觀察，並與拾荒者討論和研製產品，制訂改良措施（見圖示）。

活動：試推手推車

在測試軌道上測試手推車功能。
